

3. Delisted Substances

In this Table are several substances formerly listed in the NTP Report on Carcinogens. These chemicals are not present in the *Eighth Report on Carcinogens* because either no documented continuing exposure of residents of the United States to these chemicals/substances exists (since they are no longer produced or

used), or because there has been a revision in the rulings/findings as to the carcinogenic potential of these entries (due to new tests, etc.). The last Report on Carcinogens in which these chemicals/substances appeared, and to which therefore reference can be made for all information available, is also given in this Table.

3. Delisted Substances.

Substance name	CASRN	Last listing ^a	Reason for delisting
Aramite®	140-57-8	4th ARC (1985)	No U.S. residents exposed
<i>N,N'</i> -Bis(2-chloroethyl)-2-naphthylamine (Chlornaphazine)	494-03-1	4th ARC (1985)	No U.S. residents exposed
Chloramphenicol	56-75-7	1st ARC (1980)	Human data considered inadequate
Cycasin	14901-08-7	4th ARC (1985)	No U.S. residents exposed
Methyl iodide	78-88-4	4th ARC (1985)	Re-evaluated by IARC; now considered "equivocal"
5-Nitro- <i>o</i> -anisidine	99-59-2	5th ARC (1989)	Insufficient evidence of carcinogenicity
<i>p</i> -Nitrosodiphenylamine	156-10-5	5th ARC (1989)	Insufficient evidence of carcinogenicity

^a ARC = Annual Report on Carcinogens
